# FLASH DRIVE

makes an impressive & practical Corporate Gifts while promoting your brand at the same time.

## USB Flash Drives

We specialize in importing quality USB Flash Drives for promotional purposes. Our USB Flash Drives are sourced from reputable factories using quality components such as Samsung or Toshiba and carry a warranty against defects. We pride ourselves on high standard levels and after sales services to ensure you peace of mind when dealing with us.

### Reasons why you choose us as your USB Flash Drive source.

- We import original chips separately and after testing & quality checking, We fix them in USB shells.
- We never import duplicate or upgrade chips and we offer warranty against defect.
- Fast delivery from ready stock.
- Big variety and range of products to select.
- Competitive prices with higher quality.
- Mock Ups and E-Samples

### What are upgraded chips?

Unfortunately some manufacturers using a lower capacity memory and selling as a higher capacity memory.

### What are upgraded chips?

(1) They use a software to upgrade 1GB to 4GB. When using the chip in your computer it shows 4GB but can't accept files more than 1 GB because the real capacity is 1GB.

(2) They use 4 pcs of 1 GB chip instead of 1 piece 4 GB memory. When you save a file more than 1 GB it will show an error and if you save a file less than 1 GB it will be saved but when you need to reopen the file, as it is not clear in which one of the chips is saved. again

**We never use upgrade chips  
We use only original chips!**

Certified antimicrobial additive releases silver ions and prevents bacteria from settling on the surfaces of the pen.

#### Bacteria: up to 99,99% less

RPET stands for recycled polyethylene terephthalate, or recycled PET. PET is a strong, durable and recyclable material that is used for soda bottles, water bottles and food jars, while RPET can be made into such products as blankets, insulation, car parts, shoes and more. RPET is produced by collecting, sorting and recycling PET, then refining the material into flakes that can be turned into new products. Using RPET as an alternative to PVC is a huge step forward on the path toward a greener, safer and cleaner future.
